

SMART SECURITY

Cybersecurity Tips for Your Business

Use Unique Passwords

- Encourage password managers
- Enable multi-factor authentication (MFA)

Keep Software Updated

- Regularly update operating systems, apps & antivirus
- Automate updates when possible

Train Your Employees

- Conduct regular cybersecurity training
- Teach how to spot phishing emails & scams

Back Up Your Data

- Perform secure, regular backups
- Use encrypted cloud storage

Limit Access to Sensitive Information

- Use role-based permissions
- Monitor and log user access

Secure Your Network

- Use firewalls and strong Wi-Fi encryption
- Set up a VPN for remote access

Develop an Incident Response Plan

- Be ready for breaches
- Document roles, contacts & recovery steps
